RATCHET LOCKING CABLE TIES Epoxy Coated Stainless Steel

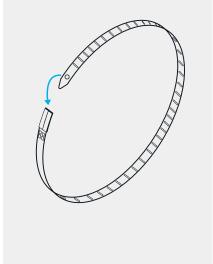

INSTALL STEPS

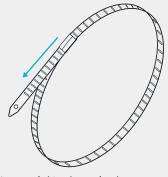

1. WRAP CABLE TIE AROUND BUNDLE

2. INSERT STRAP **THOUGH TIE HEAD BY HAND**

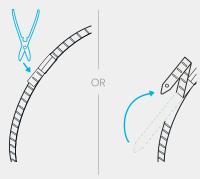

3. PULL TIE THROUGH TO DESIRED LEVEL

- · No special tool required
- Ensure the locking pin is secure
- · Tie can be loose or tight depending on needs as it will lock into place however you wish to set it.

4. BEND AWAY OR **CUT OFF EXCESS**

- · Bending or folding excess is easy if it suits the installation
- If cutting excess, using tin snips is far less effort than side cutters
- Prevent sharp edges for the next person and reduce risk of cable damage.
